On the Love of the Lotus

Although there is a great variety of flowers, both growing on land and in water, the Yin Ming was the first to demonstrate the true beauty of the lotus flower. Since then, the lotus has been revered as a symbol of purity and enlightenment. In the realm of flowers, the lotus is considered the most precious, and its perfume is said to be as sweet as the honey of bees. But in reality, the lotus requires a great deal of effort and care to be cultivated and maintained properly. Only those who truly appreciate its beauty and value can truly appreciate its beauty. In this way, the lotus is used as a metaphor for the path of enlightenment and spiritual growth. It is said that those who cultivate the lotus will be rewarded with true enlightenment.

My Native Land, Good-Night

by Sean O'Casey

The city was alive with the sounds of children playing and the distant rumble of traffic. The streets were crowded with people of all ages and backgrounds, each going about their day in their own unique way. Despite the noise and commotion, there was a sense of peace and tranquility that permeated the air. It was as if the city was breathing a collective sigh of relief, as if it was taking a moment to enjoy the beauty of its own existence.

A SCENE IN THE STREET

I stood alone in the bronze moonlight, listening to the sound of the city as it slept. The streets were empty, and the only sound was the gentle rustling of the leaves as they blew across the pavement. The light from the streetlamps flickered across the faces of the buildings, casting long shadows and creating a sense of mystery.
